

Greed controls all in capitalistic society and this issue is perfect example of that dynamic.

I watched the Congressional hearing on CSPAN [one of the only balanced broadcasts on cable] and I have rarely seen a more feeble attempt by corporate profiteers to rationalize their greed for money and power. And yet they will win the day on June 2 not because their cause is just, but because the public is ignorant and even if they weren't, it would make little difference, because public opinion has been trivialized by the Cheney/Rumsfeld administration and their puppet G.W. Bush as well as the neo conservative mainstream media.

Mr. Powell [nepotism is alive and well in America] is doing well for his corporate owners.

Perhaps it is time for freedom loving people to leave America.
